PROFESSIONAL SUMMARY

AI Engineer focusing on **Computer Vision and Applied Deep Learning**, with hands-on experience through research and project-based development. Built practical vision systems including **fine-grained product authentication, document OCR, and image-based automation applications**. Proficient in developing and deploying AI services with **FastAPI and Docker**, and familiar with optimizing model inference for efficient performance. Seeking to contribute to **Computer Vision and AI solutions in real-world production environments**.

EDUCATION

University of Technology and Education – The University of Da Nang	Da Nang, Vietnam
<i>Engineer in Information Technology – GPA: 3.72/4.0 (Valedictorian)</i>	<i>2021 – 2025</i>

ADDITIONAL INFORMATION AND SKILLS

- **Programming:** Python, JavaScript (Next.js)
- **Libraries & Frameworks (AI/ML):** PyTorch, OpenCV, HuggingFace, LangChain
- **Computer Vision:** Object Detection, Fine-grained Recognition, OCR, Image Preprocessing
- **Data Processing:** NumPy, Pandas
- **Backend & MLOps:** FastAPI, Docker, Git, Linux
- **Model Optimization:** Quantization, Caching
- **Databases:** PostgreSQL, SQL Server
- **Languages:** English (B1), Vietnamese (Native)

WORK EXPERIENCE

Rikai Technology	09/2025 – Present
<i>AI Engineer</i>	<i>Da Nang, Vietnam</i>
– Project: Luxury Authentication System	
* Developing a fine-grained Computer Vision system to detect counterfeit luxury watches.	
* Implemented part-level classification models using Vision Transformer and ConvNeXt for real vs fake component recognition.	
* Built decision aggregation logic to combine multi-part predictions into final authenticity scores.	
* Created dataset preprocessing, annotation, and class-balancing pipelines to improve training stability and generalization.	
* Researched and benchmarked state-of-the-art detection and recognition architectures for performance improvement.	
– Project: AI Ad Planner System	
* Built a data warehouse and data processing pipelines to support AI-driven advertising campaign planning and reporting.	
* Implemented backend data services for ingestion, transformation, and analytics using FastAPI and SQL-based workflows.	
* Performed data cleaning, aggregation, and feature preparation to generate structured datasets for business insights.	
* Developed interactive analytics dashboards using Next.js for campaign visualization and user interaction.	
* Integrated an intelligent chatbot utilizing Retrieval-Augmented Generation (RAG) and LLMs to assist users in querying campaign metrics and generating advertising strategies.	
SafeHorizons	02/2025 – 06/2025
<i>Software Engineer</i>	<i>Da Nang, Vietnam</i>

- Developed real-time IoT monitoring dashboards using FastAPI and WebSockets.
- Implemented bidirectional telemetry streaming for edge devices.
- Built secure web-based SSH interfaces enabling remote system operations.
- Designed JWT-based authentication and role-based access control for admin portals.

- Developed an **AI-driven meeting summarization pipeline** integrating Whisper ASR and Transformer-based summarization models.
- Designed text pre-processing, diarization, and segmentation workflows to improve transcription and summary coherence.
- Optimized inference via **quantization, batching, and caching**, reducing latency and increasing throughput.
- Built RESTful inference APIs using FastAPI for real-time deployment.
- Containerized and deployed GPU inference services with Docker.

KEY PROJECTS

EduScan – Automated Exam Grading System | *FastAPI, YOLOv12, OpenCV, PostgreSQL*

2025

- Designed and developed an AI-powered system for automatic grading of multiple-choice exams from scanned or camera-captured images.
- Implemented image alignment, answer region detection, and marking recognition using YOLO and OpenCV.
- Built scoring logic and database integration for result analytics.
- Deployed the system on a Linux VPS, significantly reducing grading time and manual effort.

CERTIFICATIONS

- Machine Learning Specialization (Stanford – Coursera)
- ChatGPT Prompt Engineering for Developers (DeepLearning.AI)
- AI For Everyone (Coursera)
- Crash Course on Python (Coursera)
- PLAN DE COURS PYTHON POUR L'INGENIEUR (Prof. Marc Geateno)
